

# Dr. Rose's Remedies

Chadds Ford, Pennsylvania

By Celeste Karpf

**D**r. Rose DiLeva, VMD, MS, CVCP, and CVA, knew she wanted to create a skin salve for pets that would be effective as well as a safe, all-natural alternative to steroids and artificial preservatives. "About 10 years ago I started testing different formulas until I came to the present formulation, which I found had the most efficient and quickest healing properties." Dr. DiLeva is certified in Chinese Herbology, Acupuncture and traditional Chinese Medicine, as well as, Chiropractic treatments. Using this knowledge, Dr. DiLeva combined Chinese, American, and Indian herbs to create this incredible formula.

After introducing the salve to her clients, they were so pleased with the results that they urged Dr. DiLeva to create her own brand and product. Thus, Dr. Rose's Remedies was born.

Dr. Rose's Remedies is a topical ointment that works to heal a myriad of skin conditions including open wounds, sores, and bacterial infections for all animals. Dr. DiLeva has found particular success in healing rain rot on horses. "It's a fungal, bacterial condition that basically grows the best in areas of low oxygen concentration," explains Dr. DiLeva.

Dr. DiLeva tested the product on a variety of infected horses located at a nearby facility. One mare in particular had an extremely devastating case. "Her entire back end on both sides was covered. It just made you hurt to look at it," says Dr. DiLeva. After applying the ointment daily, Dr. DiLeva found that every one of the horses was completely cured of rain rot within 14 days!

"The manager of that particular facility said that in the past thirty years, she had never seen a product that worked as quickly and actually cured it – resolved the whole issue – in that amount of time." In many cases, rain rot can take several treatments over the course of a long period to remove completely.

"In my clinical experience over the years, I'd estimate it

*Mare, Steffi, suffers from the condition known as "rain rot."*

*After just 14 days of using Dr. Rose's Remedies, Steffi's condition has healed.*

heals surgical wounds about 30% faster than other products," says Dr. DiLeva. Using Dr. Rose's Remedies will also prevent scarring, and because it does not contain alcohol, it will not burn when applied to a sensitive area. Dr. Rose's Remedies can be used on countless skin conditions, including lacerations, surgical incisions, interdigital dermatitis, hot spots, and insect bites.

Dr. Rose's Remedies is an all natural, all herbal salve that contains no steroids, no gluten, and no artificial preservatives. This product is antiviral, antifungal, and antiseptic, as well as anti-hemorrhagic and anti-inflammatory. It will not harm the animal if ingested, and is safe around children.

"It's much better," says Dr. DiLeva of using products that contain natural ingredients. "You don't have any side effects, you have much quicker healing, it moisturizes the skin and it doesn't sting." Plus, Dr. Rose's Remedies has proven to heal conditions more effectively and faster than conventional products on the market.

Dr. Rose's Remedies comes in both a cream form and a spray. The spray is useful for wounds that are too sensitive to touch. It also has a very long shelf life of five years, which is not common in similar products.
